Department of Mechanical and Mechatronic Engineering
University of Stellenbosch
Private Bag X1, Matieland 7602 , South Africa.

Abstract

The stb-thesis class is provided to typeset theses and dissertations that conform to the requirements of Stellenbosch University, South Africa.

The class file stb-thesis.cls is based on the standard \LaTeX book class. It is primarily concerned with the formatting of the front matter such as the title page, abstract, etc. It also works together with the babel package to provide language options to typeset documents in Afrikaans or in English.

*This class has version number v1.0, last revised 2023/01/10.

[†]Any help with proofreading this document will be appreciated.

1 User Interface

1.1 stb-thesis class file

The stb-thesis.cls class is loaded in the document preamble with

```
\documentclass[12pt,oneside,openany,a4paper, %... Layout
             afrikaans,UKenglish,          %... Global lang drivers
             masters-t, goldenblock         %... Thesis options
             ]{stb-thesis}
```

1.1.1 The stb-thesis options:

Document type options: This options for the stb-thesis class/style are for specific formatting of the title and abstract pages of the different document types.

masters-a: An assignment masters degree.

masters-t: A thesis masters degree.

PhD: A PhD dissertation.

Type block sizes: The ISO A4 paper size (297.3 mm × 210.2 mm) is not ideally suited for typesetting off books. The *A5 type block* (fig 1) and the *golden ratio type block* (fig 2) are layouts designed by the great typographer Jan Tschichold which adheres to the classic typographic principals.¹ A 12 pt font size is recommended for most fonts. The following options are provided as part of the stb-thesis class/style options:

a5block: ISO A4 paper with A5 type block

goldenblock: ISO A4 paper with golden ratio type block,

wideblock: Type block with 25 mm borders

stdblock: Standard L^AT_EX type block [default].

The user can set up custom page layouts if needed. The setup depends on the class file used. The following example is for a page with 30 mm margins all around.

```
\documentclass[a4paper,<options>]{stb-thesis}
\usepackage[hmargin={30mm,30mm},
            vmargin={30mm,30mm}
            ]{geometry}
```

¹The Tschichold designs have a 3:5 ratio between the inner and outer margins. The stb-thesis package employs a symmetric layout

Table 1: Page layout parameters

	A5 type block (a5block)		Golden section type block (goldenblock)	
Page width	W	= 210,2 mm	W	= 210,2 mm
Page height	$H = \sqrt{2} W$	= 297,3 mm	$H = \sqrt{2} W$	= 297,3 mm
Block width	$w = H/2$	= 148,7 mm	$w = 2W/3$	= 140,1 mm
Block height	$h = W$	= 210,2 mm	$h = H - W/3$	= 227,2 mm
Side margin	$s = (W - w)/2$	= 30,8 mm	$s = W/6$	= 35,0 mm
Top margin	$t = 3(H - h)/8$	= 32,7 mm	$t = 3W/24$	= 26,3 mm
Foot margin	$f = 5(H - h)/8$	= 54,4 mm	$f = 5W/24$	= 43,8 mm

Figure 1: ISO A4 paper with A5 type block (**A5block**)Figure 2: ISO A4 paper with golden ratio type block (**goldenblock**)

1.1.2 \LaTeX class options:

The gray `boxes` are the \LaTeX default options, while `boxed` options are the preferred options of stb-thesis package.

`10pt`, `11pt`, `12pt`: Sets the size of the main font in the document. The preferred font size depends very much on the font type. For Computer Modern (the default \LaTeX font) is 11 or 12 points the most legible option on an A4 paper size.

`a4paper`, `a5paper`, `b5paper`, `letterpaper`, `executivepaper`, `legalpaper`: Defines the paper size. In South Africa is the ISO A4 paper size the standard.

`fleqn`: Typesets displayed formulae left-aligned instead of centred. This option is a matter of personal taste.

`leqno`: Places the numbering of formulae on the left hand side instead of the right. This is the traditional layout of the American Mathematical Society, but is not used for Engineering theses.

`onecolumn`, `twocolumn`: Instructs \LaTeX to typeset the document in one column or two columns. The University of Stellenbosch Engineering theses are traditionally single column documents.

`twoside`, `oneside`: Specifies whether double or single sided output should be generated. Note that this option concerns the style of the document only. The option `twoside` does not tell the printer you use that it should actually make a two-sided printout. If a printer with double sided printing capability is available, then this option can be used.

`openright`, `openany`: Makes chapters begin either only on right hand pages or on the next page available. Selection of `openright` depends on the selection of the `twoside` option.

1.1.3 Global package options:

Global options for packages and drivers can be loaded together with the class options. The most important options are the display drivers for color, graphicx and hyperref as well as the language options for babel, varioref, etc.

The display drivers are normally loaded by the \LaTeX config system defaults.

The global language options for babel can be set with:

```
\documentclass[options], afrikaans, UKenglish]{stb-thesis}
\usepackage{babel}
\usepackage{varioref}
```

1.2 Required Packages

1.2.1 Language setup

TeX provides for a variety of languages. It set up hyphenation patterns and defines language specific output such as chapter names, etc. The default language is American style English, while the South African English is the United Kingdom style. Language options must be loaded with the babel package. The last language declared is the default document language.

```
\usepackage[afrikaans, UKenglish]{babel} % English default
```

```
\usepackage[UKenglish, afrikaans]{babel} % Afrikaans default
```

or preferably with global options

```
\documentclass[options, afrikaans, UKenglish]{stb-thesis}
\usepackage{babel}
```

Languages can be made active with the `\selectlanguage{<lang-name>}` command from babel. In the stb-thesis class, a command

```
\AorE{<Afr- teks>}{<Eng- text>}
```

is provided that types one of the two arguments, depending on whether afrikaans is the active language or not. Environments for changing the language options locally are also provided in stb-thesis (if languages are installed with babel).

Afr (env.)	<code>\begin{Afr}</code>	<code>\begin{Eng}</code>
Eng (env.)	<code>Afr-teks ...</code>	<code>Eng-text ...</code>
	<code>\end{Afr}</code>	<code>\end{Eng}</code>

With the afrikaans option of babel the character " is made active. One of the reasons for this is that in the Afrikaans language a word with a dieresis can be hyphenated just before the letter with the umlaut, but the dieresis has to disappear if the word is broken between the previous letter and the accented letter, for example 'geëerd' becomes 'ge-eerd'. It is extremely important that the commands "a, "e, ..., are used in Afrikaans documents, and not \"e, etc., and neither the direct input of ë with Alt+137 (if latin1 input encoding is selected).

The afrikaans option sometimes has problems with the hyphenation of the very long words. The simplest way to correct a wrongly hyphenated word is to include the discretionary hyphen command \- in the word: e.g.: kom\-buis\-kas. Words that are incorrectly hyphenated and appear frequently within the document can be put into a list of exceptions in the preamble of the document:

```
\hyphenation{Kom-buis-kas ...}
```

It is also important to note that words that contain "e, etc. must be hyphenated by hand when they are near linebreaks, for example: koëffisiëntematriks

```
ko"ef\-fisi"en\-te\-mat\-riks
```

1.2.2 Input font encoding

In Afrikaans there are many words containing characters such as é, ô, à, ï, etc. These characters can be included directly in the input text file, except ä, ë, ï, ö and ü, which need to be inserted as "a, ..., for proper hyphenation (see previous section). If the Western European input encoding (latin1) is loaded, TeX will recognizes these characters.

```
\usepackage[latin1]{inputenc}
```

1.2.3 Output font encoding

The classic T_EX Computer Modern fonts contain only 126 characters (7-bit) per font set (OT1 encoding). It does not contain glyphs for characters such as ê. These characters are formed by two characters that are overprinted (^ + e). The result is that Afrikaans words such as “*koëffisiëntematriks*,” are not hyphenated automatically. The solution is to use the T1 encoding scheme with 256 character (8-bit) font sets. Postscript Type 1 and TrueType fonts can be configured, with the aid of T_EX’s virtual font mechanism, to be available for L^AT_EX. Font handling can be switched to T1 encoding (if you have the Postscript fonts).

```
\usepackage[T1]{fontenc}
```

1.2.4 Mathematics

Normal L^AT_EX contains many math typesetting commands and environments, but for serious mathematical typesetting you need to load the American Mathematical Society (AMS) math packages. The AMS packages also include additional math symbols, but load them only if really necessary, because they are very big.

```
\usepackage[options]{amsmath}
\usepackage{amssymb} % only if necessary
\usepackage{bm} %.. Bold math characters (after fonts)
```

Bold math symbols can be obtained with the AMS command `\boldsymbol` or with the more advanced `\bm` command from the `bm` package.

An example of a typical setup for an Afrikaans thesis with mathematics is:

```
\documentclass[masters-t, %.. Document type
12pt,oneside,openany,a4paper,a5block,%.. Layout
afrikaans,UKenglish, %.. Global lang drivers
]{stb-thesis}
\usepackage{babel} %.. Language setup
\usepackage[latin1]{inputenc} %.. Recognizes ê, ë, etc
\usepackage{amsmath} %.. Advanced maths (before fonts)
\usepackage[T1]{fontenc} %.. Type 1 fonts for proper hyphenation
\usepackage{textcomp} %.. Additional text characters
\usepackage{bm} %.. Bold math characters (after fonts)
```

1.2.5 Graphics and Color

The `graphicx` package is needed by the `stb-thesis` package to format the title page and must be loaded in the document preamble. The `color` package is optional, but very useful.

```
\usepackage[options]{graphicx}
\usepackage[options]{color} % or xcolor
```

If you need display drivers (such as `dvips`, `pdftex`, etc.) different from the default options, it is important that they are passed on to all the packages as a global option. With the MiK_TE_X this is achieved with the standard configuration file.

1.2.6 Line spacing

The guidelines for University of Stellenbosch theses dictates that either single, one-half or double line spacing be used. Line spacing can be obtained with the `setspace` packages. With this package,

footnotes and captions are still single spaced, while no additional vertical spacing is added around display math or in lists.

One and a half lines spacing for stb-thesis.cls:

```
\documentclass[<options>]{stb-thesis}
\usepackage[onehalfspacing]{setspace}%.. Line spacing
:
\begin{document}
  \frontmatter
  \begin{singlinspace}
    \TitlePage%..... Single spaced title page
  \end{singlinspace}
  :
```

1.2.7 Paragraph indent and spacing

The conventional way of typesetting running text has no separation between paragraphs, and the first line of each paragraph in a block of text indented. It is sometimes required that paragraphs are separated with a blank line and without any first line indent. This can be obtained with the parskip package.

```
\documentclass[<options>]{stb-thesis}
\usepackage{parskip}%..... Paragraph spacing + zero indent
```

Please note that this is not recommended for theses containing large amounts of mathematics, because it is difficult, if not impossible, to see where a new paragraph starts between equations.

2 Front matter

2.1 Title page

The title page is inserted on the first page of a document with the command

`\TitlePage` `\TitlePage`

Depending on the selected options, the following commands are used to set the contents of the title page:

Title

The title of the document is inserted on the front page as well as on the abstract pages of Masters or PhD theses.

`\title{<title text>}`

For a Masters or PhD thesis, the title must make provisions for both languages.
For an English document:

```
\title{\AorE{ Geforseerde Partikelvloei\[\lex]
          \normalfont\small\itshape('Forced Granular flow')}}
          {Forced granular flow}}
```

and for an Afrikaans document

```
\title{\AorE{Geforseerde Partikelvloei}
          {Forced granular flow\[\lex]
          \normalfont\small\itshape('Geforseerde Partikelvloei')}}}
```

Author

`\author{<short name>}{<full names>}`

Provides the author name not only for the title page, but for various other places in the document.

```
\author{J.\ Smith}{John Smith}
```

Faculty

`\faculty` `\faculty{<faculty name>}`

The faculty must be included in Afrikaans and English for Masters and PhD documents.

```
\faculty{\AorE{Fakulteit Ingenieurswese}%
          {Faculty of Engineering}}
```

Degree

`\degree` `\degree{<abbr>}{<full name>}`

The degree or subject names. Please refer to the yearbook for the *correct* names. The degree names must be available in Afrikaans and English.

```
\degree{\AorE{MIng (Meg)}
          {MEng (Mech)}}
{\AorE{Magister in Ingenieurswese (Meganies)}
      {Master of Engineering (Mechanical)}}
```

Supervisor/Co-supervisor

\supervisor	\supervisor[<align>]{<name>} or \supervisor{<name> \and <name>}
\cosupervisor	\cosupervisor{<name>} or \cosupervisor{<name> \and <name>}

The \studyleader and \supervisor commands are synonyms and the output depends on the document type. The commands also have a starred (*) form that stack the names of multiple supervisors. The \and has an optional argument, e.g.: \and [1ex], for spacing in a stacked environment.

\supervisor{Dr.\ D.N.J.\ Els}	→	Supervisor: Dr. D.N.J. Els
-------------------------------	---	----------------------------

or

\supervisor{Dr.\ D.N.J.\ Els \and Mnr.\ J.\ Smith}	→	Supervisors: Dr. D.N.J. Els Mnr. J. Smith
--	---	--

or

\supervisor*{Dr.\ D.N.J.\ Els \and[0ex] Mnr.\ J.\ Smith}	→	Supervisors: Dr. D.N.J. Els Mnr. J. Smith
--	---	---

For a co-supervisor

\supervisor{Dr.\ D.N.J.\ Els}	→	Supervisor: Dr. D.N.J. Els
\cosupervisor{Mnr.\ J.\ Smith}		Co-supervisor: Mnr. J. Smith

or

\supervisor{% Prof A.H.\ Basson\\[.5ex] Mechanical Engineering\\ Stellenbosch University}	→	Supervisor: Prof A.H. Basson Mechanical Engineering Stellenbosch University
\cosupervisor{% Prof P.A.\ Vermeer\\[.5ex] Institut f\"ur Geotechnic\\ Universit\"at Stuttgart}		Co-supervisor: Prof P.A. Vermeer Institut für Geotechnic Universität Stuttgart

or

\supervisor*[c]{% Prof A.H.\ Basson\\[.5ex] Mechanical Engineering\\ Stellenbosch University}	→	Supervisor: Prof A.H. Basson Mechanical Engineering Stellenbosch University
\cosupervisor{% Prof P.A.\ Vermeer\\[.5ex] Institut f\"ur Geotechnic\\ Universit\"at Stuttgart}		Co-supervisor: Prof P.A. Vermeer Institut für Geotechnic Universität Stuttgart

Date

```
\date{<month>}{<year>}
```

The date when the document is handed in. The arguments must be numerical,

```
\date{10}{2003}
```

→

```
October 2003
```

Sponsor

Sponsors such as the NRF requires an acknowledgement on the title page

```
\SetSponsor \SetSponsor{<text>}
```

```
\SetSponsor{The financial assistance of the National Research Foundation (NRF) towards
this research is hereby acknowledged. Opinions expressed and conclusions arrived
at, are those of the author and are not necessarily to be attributed to the NRF.}
```

Custom title page

The user can create his or her own title page (see figure 5), for example:

```
\thispagestyle{empty}
\vfill
{\LARGE\noindent Seakeeping control of HYSUCATs \par}\vspace{2em}
{\LARGE\noindent by \par}\vspace{2em}
{\LARGE\noindent Giovanni Sergio Milandri \par}\vfill
\noindent
\begin{minipage}{.9\textwidth}
\large\slshape\raggedright
Thesis presented in partial fulfilment of the requirements
for the degree of Master of Engineering (Mechanical) in
the Faculty of Engineering at Stellenbosch University
\end{minipage}
\vfill
{\normalsize\noindent Supervisors:\\[1.5ex]
\begin{tabular}{@{}ll@{}}
Prof J.L.\ van Niekerk & Dr G.\ Migeotte \\[.5ex]
Dept of Mechanical Engineering & Unistel Technologies (Pty) Ltd\\
University of Stellenbosch & University of Stellenbosch
\end{tabular}\par}
\vspace{2em}
{\LARGE\noindent April 2006\par}\clearpage
```

2.2 Declaration page

Every thesis and dissertation *must* include a declaration page. The `\DeclarationPage` command set the required text in the default language and output the copyright statement.

```
\DeclarationPage \DeclarationPage
\DeclarationDate \DeclarationDate{<date>}
```

Figure 3: Title page with PhD option

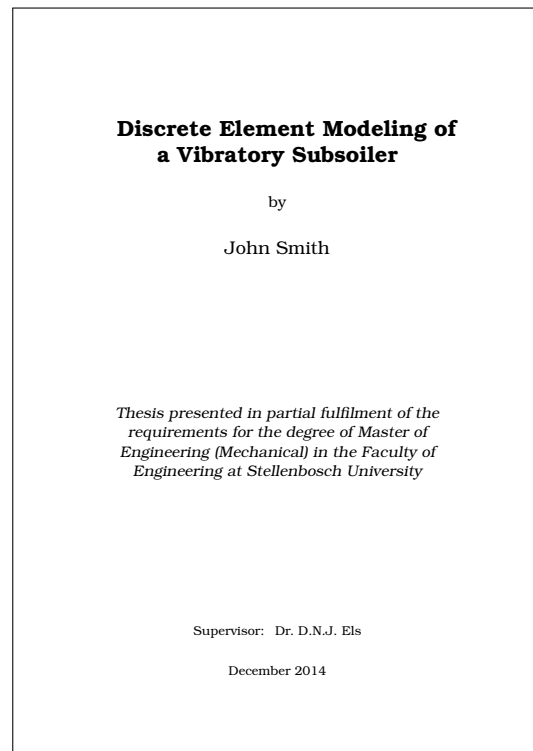

Figure 4: Title page with master-t option

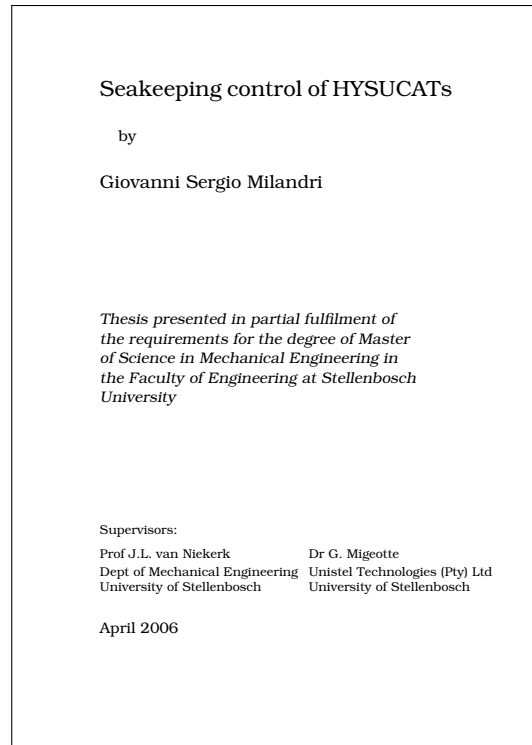

Figure 5: Custom title page for masters thesis

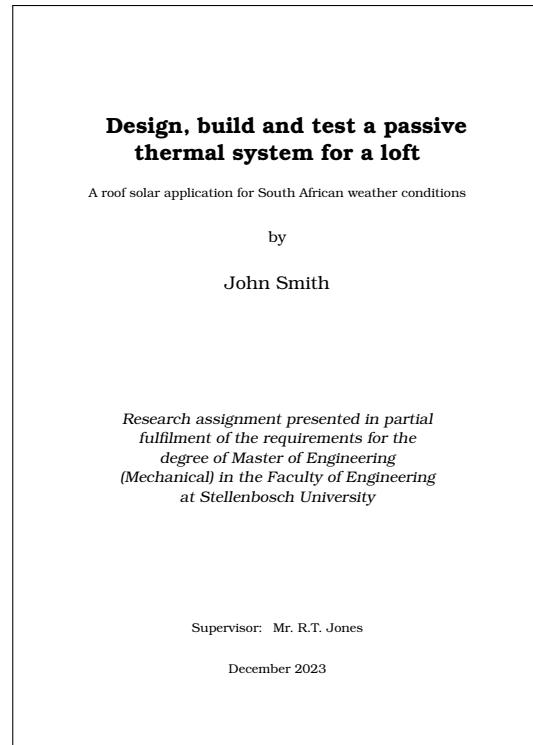

Figure 6: Title page with masters-a option for a masters assignment project

2.3 Copyright Information

The copyright information in a thesis or dissertation is compulsory from 2007. It is added to the bottom of the declaration page. The default copyright holder is the University of Stellenbosch.

The default copyright holder can be changed with:

```
\SetCopyrightHolder \SetCopyrightHolder{<new copyright holder>}
```

The copyright output can be switched off with

```
\SetCopyrightOff \SetCopyrightOff
```

2.4 Abstract

An abstract environment is provided that prints a page containing all the thesis information.

```
\address \address{<full address>}
```

The address must be included in Afrikaans and English for Masters and PhD documents.

```
\address{\AorE{Departement Siviele Ingenieurswese,\ \ Stellenbosch Universiteit,\ \
Privaatsak X1, 7602 Matieland, Suid Afrika.
}\%
Department of Civil Engineering,\ \ Stellenbosch University,\ \
Private Bag X1, 7602 Matieland, South Africa.}}
```

The layout of an abstract for a report differs from that of a thesis or a dissertation. It is also important to note that theses and dissertations require an English and an Afrikaans abstract.

```
abstract (env) \begin{abstract} \begin{abstract}[<language>]
Text in default language ... Text in <language> ...
\end{abstract} \end{abstract}
```

If the traditional abstract page is preferred, then use a normal chapter

```
\chapter{Abstract}
This thesis ...
```

2.5 Acknowledgements, Dedications, etc.

Acknowledgements, etc. can be included in the front matter of a document after a `\chapter` command, e.g.:

```
\chapter{Acknowledgements}
I would like to express my sincere gratitude ...
```

3 Back Matter

3.1 Bibliography/List of References

The `stb-bib` package formats bibliographies for theses and dissertations of the University of Stellenbosch. It is language sensitive and provides the correct output for both Afrikaans and English theses.

Bibliography: The list of all the citations in numerical order of citation, e.g.:

1. Rhodes, M. *Introduction to Particle Technology*. Wiley, New York (1998).
2. Cleary, P.W. The filling of dragline buckets. *Mathematical Engineering in Industry*, vol. 7, no. 1 (1998), pp. 1–24.

List of References: For author-year citations, all the citations sorted in alphabetic order, e.g.:

- Cleary, P.W. (1998). The filling of dragline buckets. *Mathematical Engineering in Industry*, vol. 7, no. 1, pp. 1–24.
- Rhodes, M. (1998). *Introduction to Particle Technology*. Wiley, New York.

The default name in the stb-thesis package is “Bibliography”. To change this to “List of References” (for a thesis), we have to overrule the babel setup. Make the following declarations

```
\documentclass[12pt,oneside,openany,a4paper,... Layout
      afrikaans,english,... Global language drivers
      masters-t,a5block ... Type and layout
]{stb-thesis}

\usepackage{babel}% Language setup
:
\usepackage{stb-bib}% Bibliography
\bibliographystyle{stb-bib-eng-a}% Author-year style
\addto\captionsafrikaans{\renewcommand{\bibname}{Lys van Verwysings}}
\addto\captionsenglish{\renewcommand{\bibname}{List of References}}
```

References to the pages or sections of citations, can be included with the backref package. The backref package loaded as part of hyperref or on its own.:

```
\iftrue
  \usepackage[backref=page]{hyperref}% Hyperlinks & backreferences
\else
  \usepackage[pageref]{backref}% Citation backreferences
\fi
\renewcommand*{\backrefalt}[4]{%
  \ifcase #1 (Not cited.)%
  \or      (Cited on page~#2.)%
  \else    (Cited on pages~#2.)%
  \fi}
```

An example is:

- Rhodes, M. (1998). *Introduction to Particle Technology*.
Wiley, New York. (Cited on pages 13 and 15.)

4 Implementation: stb-thesis

4.1 Identification

```

1 <*cls>
2 \NeedsTeXFormat{LaTeX2e}[1999/12/01]
3 \def\STB@basetype{book}
4 \ProvidesClass{stb-thesis}[\STBTfiledate
5                               \STBTfileversion
6                               Stellenbosh Thesis class (DNJ ELS)]

```

4.2 External packages

We need the calc and ifpdf packages.

```

7 \RequirePackage{calc}
8 \RequirePackage{ifpdf}

```

\phantomsection A command needed, if the hyperref package is used, for putting before certain \addcontentsline commands.

```

9 \providecommand{\phantomsection}{}

```

We need the graphicx package and it must be loaded by the user in the document preamble.

```

10 \AtBeginDocument{%
11   \ifpackageloaded{graphicx}{}{%
12     \ClassError{stb-thesis}{You must load the graphicx package}{}

```

4.3 Options

4.3.1 Language options

Utility commands:

Utility commands and environments to make local language changes.

\STB@AFRstr String in the right catcode for tests against \language name.

```

13 \edef\STB@AFRstr{\string afrikaans}

```

\AorE Command \AorE{<Afr>}{<Eng>} to type text depending on the active language.

```

14 \newcommand{\AorE}[2]{%
15   \ifx\STB@AFRstr\language name #1\else #2\fi}

```

Afr (env) Makes an Afrikaans environment inside an English document.

```

16 \newenvironment{Afr}%
17   {\ifx\language name\STB@AFRstr\relax\else
18     \selectlanguage{afrikaans}%
19   \fi}%
20   {}

```

\STB@ENGstr Make provisions for all the different types of English. The command is reset within the options.

```

21 \newcommand*\STB@ENGstr{}
22 \let\STB@ENGstr=\relax

```

Eng (*env*) Makes an English environment inside an Afrikaans document.

```

23 \newenvironment{Eng}%
24   {\ifx\relax\STB@ENGstr\relax\else
25     \ifx\language\STB@ENGstr\relax\else
26       \edef\STB@tempa{\noexpand\selectlanguage{\STB@ENGstr}}%
27       \STB@tempa
28     \fi
29   \fi}%
30   {}

```

Marker commands:

Commands of which the contents are defined later.

```

31 \newcommand\DegreeName{%
32   \ClassWarning{stb-thesis}{No degree or subject supplied}%
33   \textfb{[No degree!]}%
34 \newcommand\DegreeNameLong{%
35   \ClassWarning{stb-thesis}{No degree or subject supplied}%
36   \textfb{[No degree!]}%

```

Language commands:

Declare all the language specific text in separate macros, enabling language changes with the babel package commands.

Predefine the language commands to prevent accidental overwrite when loaded from external files.

```

37 \newcommand*\STBName{}
38 \newcommand*\AuthByTxt{}
39 \newcommand*\StudyLeaderType{}
40 \newcommand*\StudyLeadersType{}
41 \newcommand*\CoStudyLeaderType{}
42 \newcommand*\CoStudyLeadersType{}
43 \newcommand*\SupervisorType{}
44 \newcommand*\SupervisorsType{}
45 \newcommand*\CoSupervisorType{}
46 \newcommand*\CoSupervisorsType{}
47 \newcommand*\TypeAssignment{}
48 \newcommand*\TypeThesis{}
49 \newcommand*\TypePhD{}
50 \newcommand*\CopyrightHolder{}
51 \newcommand*\CopyrightTxt{}
52 \newcommand*\CopyrightAnot{}
53 \newcommand*\Signat{}
54 \newcommand*\Datetxt{}
55 \newcommand*\MasterDescript{}
56 \newcommand*\PhDDescript{}
57 \newcommand*\ThesisDeclare{}
58 \newcommand*\MonthName{}
59 \newcommand*\DeclarationName{}
60 \newcommand*\AbstractName{}

```

Input all the language setting form external files

```

61 \InputIfFileExists{stb-thesis.afr}
62   {\ClassInfo{stb-thesis}{Input file 'stb-thesis.afr' loaded}}
63   {\ClassError{stb-thesis}{No file 'stb-thesis.afr'}}{}}
64 \InputIfFileExists{stb-thesis.eng}
